Recommendation: First Class Legacy

Nathan and his team at First Class Legacy were highly valued partners in ICE's organ donation engagement programme with African Caribbean communities in Birmingham in 2016.

The programme was part of a pilot in Manchester and Birmingham to support the NHS Blood and Transplant's wider and ongoing programme with BAME communities.

Nathan and his team played a key role in overcoming the barriers to organ donation and changing perceptions, through promotional activities and an event, which has resulted in significant numbers of new organ donor register sign-ups from members of the African Caribbean community.

I really enjoyed working with First Class Legacy, am hugely grateful for their hard work and commitment and wouldn't hesitate in recommending them to others.
